

SBS NIG Plug-in Solution Overview

The SBS NIG Plug-in is a comprehensive library of functionality which sits on top of GE Smallworlds NIG Physical Browser product. Physical Browser is a web browser based query, view, print tool that gives users simple access to the data held in PNI over the Internet or a company intranet. The SBS NIG Plug-in simplifies the Physical Browser GUI while at the same time extending the browsers capabilities.

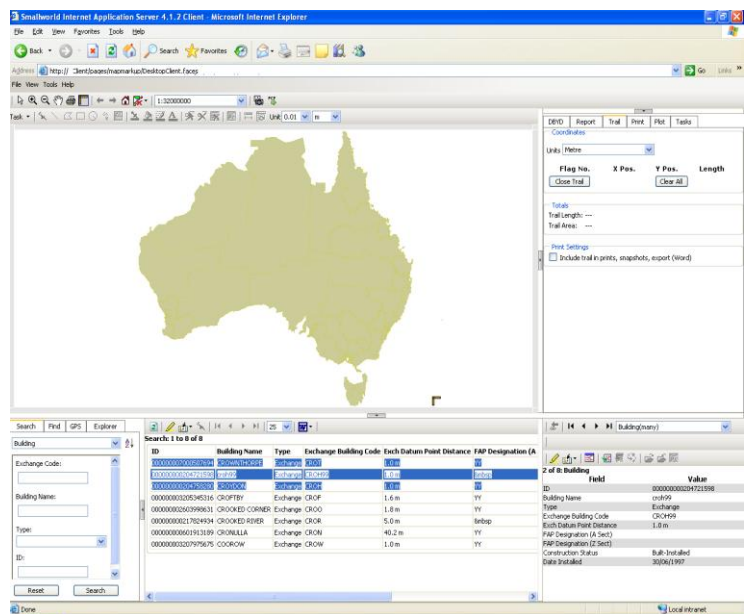

Key Features:

The SBS NIG Plug-in provides a range of standard functionality and is extensible to add new functionality.

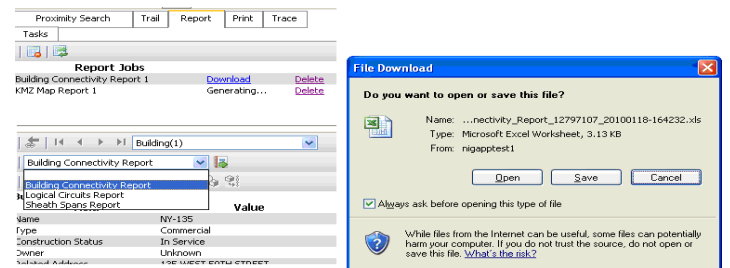

Key features of the SBS NIG Plug-in are:

- More intuitive client layout with fewer tab activations and an increased use of floating dialogs
- Access third party address geocoding services
- Asynchronous reporting and downloading allows users to generate:
 - Google Earth exports
 - FME exports
 - Reporting against individual assets
- Utilises both Locators for simple queries, and Find functionality for more complex Geospatial queries
- Supports selecting multiple objects in the Object Lister. This allows users to:
 - Go to multiple selected objects
 - Highlight multiple selected objects
 - Place markers at selected object locations
- Allows documents to be attached to Tasks and have these uploaded to the server.

Benefits:

- More intuitive GUI reduces training time for end users while increasing browser performance.
- Enhances several key NIG components to reduce the number of user key clicks to perform operations
- Easily maintained and extended.
- Reduce maintenance and support costs by enhancing standard core components as opposed to developing new components.

About Spatial Business Systems:

Spatial Business Systems is a geospatial technology consulting firm based in the USA and Australia that specializes in highly integrated, enterprise GIS solutions. SBS is uniquely experienced at integration of GIS with traditional information systems and seamless coexistence solutions of different GIS products. Spatial Business Systems personnel have performed over 100s of engagements in support of the utility, telecommunications and government markets worldwide.
