

Save an Office 2007 Document as a PDF without a 3rd party application.

If you are using Microsoft Office 2007 or any of the individual products bundled within the Microsoft Office Package you can save your Microsoft Office documents as PDFs without the use of a third party application such as Adobe Acrobat Standard.

Start by exiting all of your currently running Microsoft Office products then download and install the required [Microsoft Office Add-in](#)

Most all of the Microsoft Office 2007 products will allow you to save in a pdf format after you have installed the above add-in. For specific instructions on how to save as a pdf from each Office application visit this [site](#).
