

Smallworld Integration Server for ESRI

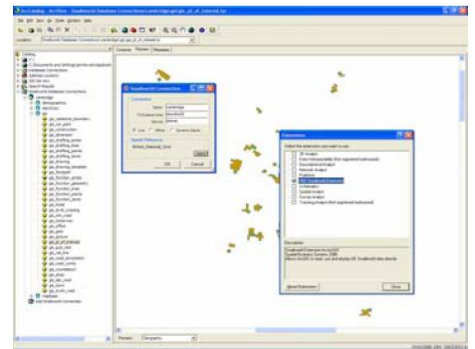

Solution Overview

The next generation of interoperability is here. The Smallworld Integration Server for ESRI, developed by Spatial Business Systems, leverages proven technology from SBS and Safe Software to provide a truly open and seamless operating environment. This product takes advantage of FME to dynamically connect the ESRI ArcGIS products with the GE Smallworld VMDS data repository. Key features of past versions such as high performance data access, extensive support for different spatial data types and data interoperability compliment the new features perfectly to provide a robust real-time solution users have grown accustomed to from SBS.

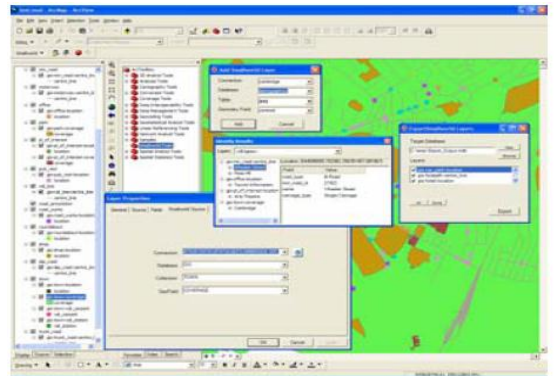

Key Features:

- An Integrated architecture that allows full access to the Smallworld VMDS data store from the full range of ArcGIS products, including:
 - ArcCatalog
 - ArcMap
 - ArcGIS Server
 - ArcIMS
- Support for development of custom tools and applications via ArcObjects for development in ArcToolbox
- High performance data access via Smallworld data marshalling
- Web or desktop access via TICS protocol
- Dynamic data model mapping of Smallworld objects to ArcGIS layers
- Support for access to Smallworld via live, offline and dynamic cache modes
- Ability to utilize FME Server, offering a scalable solution

Benefits:

- Leverage your GIS investments across the enterprise
- Exploit multi-vendor product strengths
- Exploit a variety of third-party application products
- Obtain overall cost savings
 - Reduce database maintenance
 - Reduce custom applications
 - Get results faster with less custom development
- Receive high performance integration tools that
 - Reduce redundant data sources
 - Integration with minimal customization
- Create new applications in .NET development environment
- Ability to leverage FME Software
- Open your Smallworld GIS system to over 250 different formats including all of the ArcGIS formats

About Spatial Business Systems:

Spatial Business Systems, Inc. is a geospatial technology consulting firm based in Denver, Colorado, USA that specializes in highly integrated, enterprise GIS solutions. SBS is uniquely experienced at integration of GIS with traditional information systems and seamless coexistence solutions of different GIS products. Spatial Business Systems' personnel have performed over 100s of engagements in support of the utility, telecommunications and government markets.
